Year	Month	Education

Year	Month	Licenses and Certifications
2009	August	TOEIC Score: 850
2009	October	Fundamental Information Technology Engineer

Career Objective / Skills / Interests

I am particularly fascinated by the potential of Artificial Intelligence (AI) in the ever-evolving field of IT, which is why I aspire to work in this industry. With the recent progress in AI, automation and advanced data analysis are becoming more common, and the role of IT in society is expanding significantly.

At university, I majored in computer science and gained fundamental knowledge of image recognition and natural language processing using AI. For my graduation research, I worked on improving the response accuracy of chatbots by building models capable of understanding user intent more effectively.

I hope to apply AI technologies in real-world businesses and services to enhance people's lives. I am committed to continuous learning and aim to become an engineer who can bridge the gap between technology and society.
